TREE ANCHORING – TYPE B

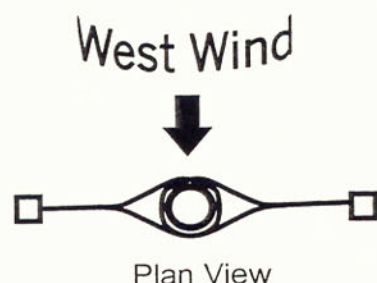

For trees up to 2 inches caliper

May, 2001
Effective Date

Typical Section

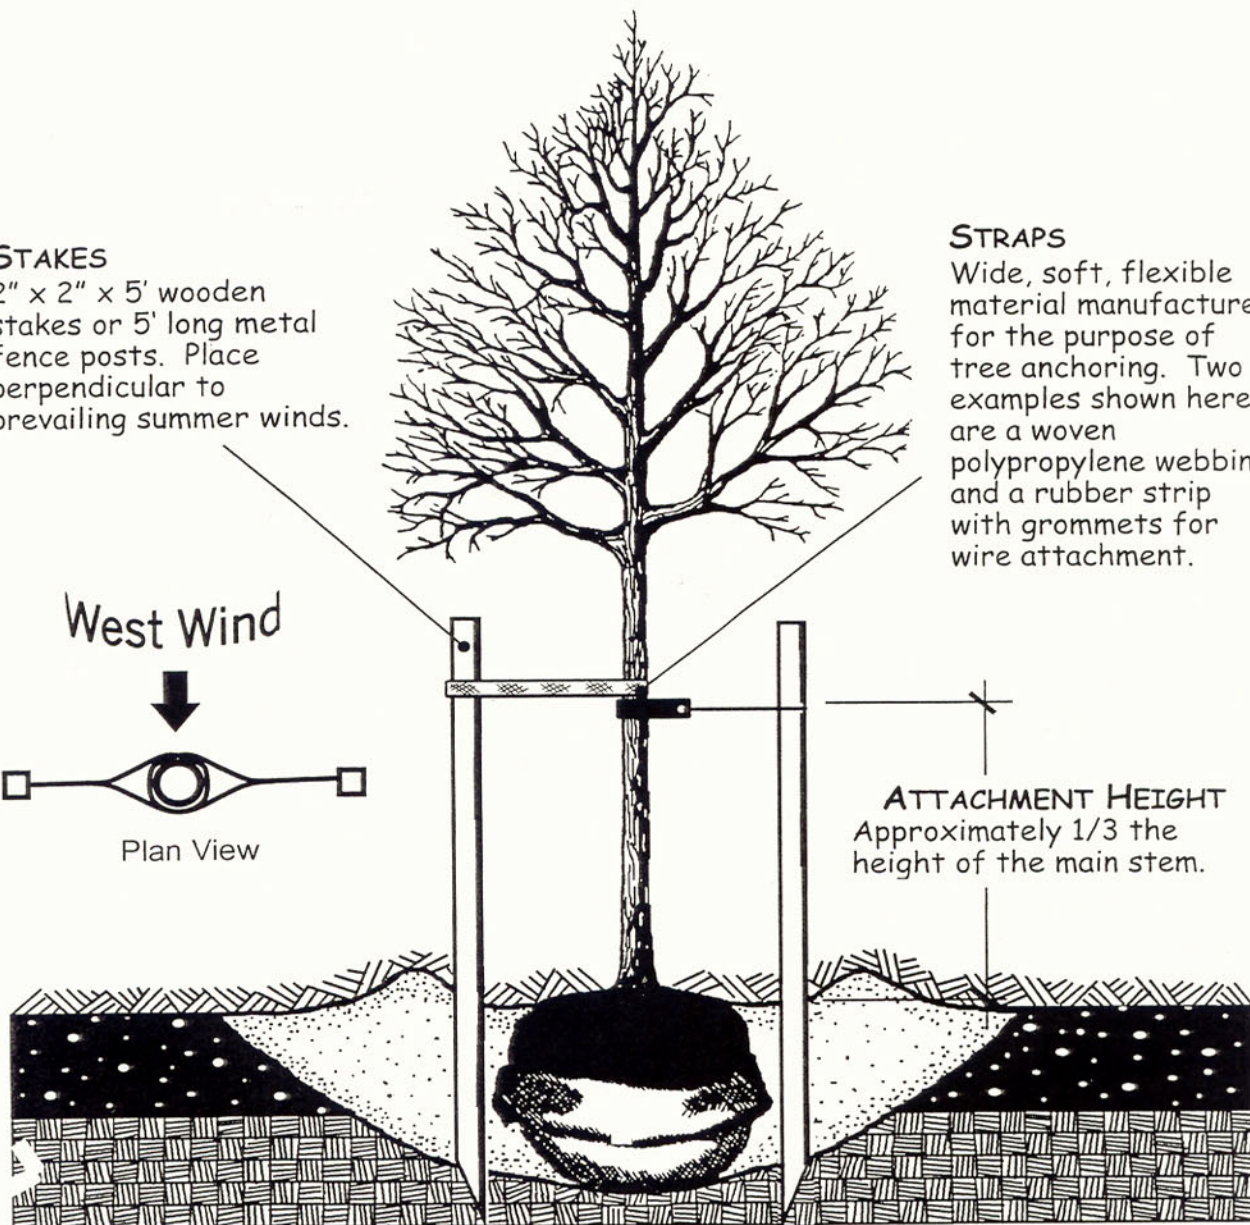

STAKES

2" x 2" x 5' wooden stakes or 5' long metal fence posts. Place perpendicular to prevailing summer winds.

STRAPS

Wide, soft, flexible material manufactured for the purpose of tree anchoring. Two examples shown here are a woven polypropylene webbing and a rubber strip with grommets for wire attachment.

Use anchoring systems only where wind or soil conditions make it necessary. Remove after one year.
